ACKNOWLEDGEMENTS

Writing a textbook is challenging. Proof reading a textbook is impossible. I have no words to express the gratitude I have for all of those students who found and pointed out the myriad of grammatical errors I unwittingly managed to incorporate into the original text. I would also like to thank Sterl Phinney from Caltech for helping me so much on the Relativity chapter, Chris Ulmer for his invaluable assistance on the semi-conductors chapter, and Cathy Dees for trudging through the text looking for grammatical errors even though she knows very little physics and, hence, probably found the effort to be a complete bore.
